

CONTACT LENS REQUIREMENTS FOR YOUR EYE CARE PRACTITIONER

- It is important that the contact lenses be worn for the time period prescribed by the client's vision care specialist before being submitted for testing.
- Soft contact lenses.
- Lenses must be of the same material for each eye.
- No bifocals. They cannot be tinted.
- We cannot tint any lenses already having factory tint; i.e. visa tint, handling tint, enhancement, etc.
- Do not send lenses worn more than 60 days. They may have deposits and will not tint satisfactorily.
- Occasionally, a lens will tint with small spots or slight discolorations in the color; this is inherent in the lens material from the manufacturing process. However, it should not affect the usability of the tinted lens.
- Ship contact lenses **IN GLASS VIALS** at least half full of contact solution.
- Shipping should be by a traceable and insured mail service.
- **FDA REQUIRES THAT ALL ORDERS MUST BE ACCOMPANIED BY THE CUSTOM ORDER CERTIFICATION FORM (SEE ATTACHED) SIGNED BY THE EYE PROFESSIONAL.**
